## Eclypt PICO freedom

USB flash drives are extremely popular for transporting data. This is down to convenience in terms of their size and easy to use plug-and-play facility.

Unfortunately their greatest asset is their greatest downfall; as small and convenient as they are, the more likely they and their data are to be misplaced, lost or stolen. This could mean the loss of sensitive customer data, a tarnished reputation and heavy fines.

Eclypt PICO freedom addresses these concerns with its hardware-based, FIPS 140-2 level 2 validated encryption that protects mobile data inside and outside the corporate environment. All files are encrypted 100% of the time, ensuring maximum security alongside its tamper-resistant design.

You can be sure that even when lost or stolen, data stored on Eclypt PICO freedom remains confidential between you and your customers.

### USB Flash Drive Product Specification

**256-bit AES encryption**

**Mandatory security of all files**

**Strong password authentication**

**Lockdown mode after several  
incorrect password attempts**

**Transfer speeds: 24MB/s Read  
20MB/s Write**

**Supported Platforms:**

**Windows 2000 (SP4)**

**Windows XP (SP1, SP2)**

**Windows 2003 Server**

**Windows Vista**

**Options:**

**FIPS 140-2 Validated Model**

**PICO Management Software**

**1GB, 2GB, 4GB or 8GB Capacity**

**FlagStone Technology ~ Hardware Encryption at its Best**

Eclypt integrates sophisticated authentication, entire disk encryption and data storage into tamper-resistant internal or portable hardware that safeguards your data. This provides instant data protection without any adverse effects on your computer's performance.
